Winter 2021

Spring 2021

Implementing Suicide Prevention Strategies

In this free series, care team members will work with experts and peers to build a better understanding of suicide prevention activities and will take a multidisciplinary approach to implementing evidence-based strategies designed for primary care practices.

Addressing Childhood Obesity in Primary Care

In this free series, care team members will learn from Children's Hospital Colorado lifestyle medicine specialists how to utilize effective communication strategies, address nutrition and physical activity guidelines, incorporate comorbidity screening, and when to make referrals to address childhood obesity.
