Pre-Work

In preparation for Session One of the series, participants are requested to select a “Change Initiative” to focus on during the series.

Instructions for selecting the “Change Initiative”

- Each person should select a change initiative that meets the following criteria.
- Criteria:
  - The change initiative should be one in which there has already been a decision to move forward
  - The change has a significant impact on you and the area in which you work
  - If you are a manager, the change should be one in which your leadership is key to the successful accomplishment of the change for the people reporting to you
  - For the change initiative to be successful, people will have to think or behave differently than they did prior to the implementation of the change initiative
  - Select a change that has not been fully implemented, and fits into one of the following categories:
    - The change has been approved for implementation, however it is still in the planning stages
    - Implementation of the change has only recently begun
    - The change is well underway, however, there is significant resistance that may lead to an unsuccessful implementation
  - It does not matter if you consider the change as positive or negative
