CONTINUING MEDICAL EDUCATION (CME) CREDIT QUESTIONS

You must attend the entire webcast and complete the following post-test in order to qualify for CME credit. Failure to complete all CME questions will result in no CME credit awarded.

16) Clinicians can offer effective brief counseling intervention for tobacco cessation for most patients with a total time commitment of as little as:

- A) 1 minute to briefly advise patients to quit
- B) 10 to 20 minutes
- C) 30 to 90 minutes
- D) Behavioral intervention is only effective when used with pharmacological smoking cessation aids.

17) Which one of the following statements is correct?

- A) Smoking cessation counseling by telephone does not work.
- B) Chart reviews show most physicians advise all patients to stop using tobacco on every visit.
- C) Tobacco dependence is considered to be an acute disease.
- D) Brief counseling interventions for smoking cessation are only effective when delivered by physicians.
- E) Effective interventions for tobacco cessation can be delivered during a typical 10-minute office visit.

18) Identifying patients who use tobacco, such as tracking a vital sign for every patient, is important because:

- A) Smoking is one of the few risk factors that can be modified during pregnancy.
- B) Recording the information as a chart vital sign helps track smoking status for follow-up at future visits.
- C) Asking patients about smoking status each visit increases the likelihood of successful intervention.
- D) All of the above.

19) Which statement about office staff involvement in the 5 A's tobacco cessation approach is accurate?

- A) Only the treating physician should be involved in intervention because the patient may be embarrassed.
- B) Staff involved in starting an office cessation program must attend extensive, ongoing training.
- C) An office intervention program is only feasible in a large setting with patient education providers.
- D) The 5 A's intervention can be adapted according to the office size and the availability of staff.

20) When advising a patient to quit which is the recommended attitude to use as presented in the 5 A's approach?

- A) Gently remind the patient that society will view her as a "bad mother" if she does not quit.
- B) Offer the patient pamphlets about the effects of smoking and wait to see if he asks about quitting.
- C) In a strict tone, provide a list of health risks to his child so he will know you are serious.
- D) Use positive language and focus on the benefits of quitting.
